BUGRA OZKAN

Senior Software Engineer

London, UK +44 7957 764222 bugra@episolo.com linkedin.com/in/bugraozkan bugraozkan.net

PROFESSIONAL SUMMARY

Senior Software Engineer with over 10 years of experience spanning Full Stack Web Development, AI, and Computer Vision. Proven track record of architecting scalable full-stack applications and end-to-end data systems — from cloud infrastructure to production ML models. Adept at measuring product performance through data-driven KPIs, collaborating with customers and stakeholders, and guiding technical teams to deliver complex, high-impact solutions on time.

CORE SKILLS

Languages: JavaScript, TypeScript, Python, SQL, Go

AI & Engineering: PyTorch, TensorRT, OpenCV, YOLOv9, FastAPI, Node.js, React, Next.js, MongoDB, Kafka, Grafana

Cloud & Infrastructure: GCP (BigQuery, Vertex AI, Dataflow, Pub/Sub, Compute Engine, Cloud Run, Cloud Functions), Docker, Kubernetes

Leadership & Product: Team Leadership, Technical Roadmap, Stakeholder Management, Agile/SAFe, Mentoring, Hiring, CI/CD

PROFESSIONAL EXPERIENCE

Creator – Episolo.com

Jun 2025 – Present · London

AI web app builder that turns user prompts into deployed web apps with built-in DB, auth, and AI

- Architected and shipped a full-stack AI web app builder using Next.js, MongoDB, and 6 GCP services (Cloud Run, Cloud Storage, Cloud CDN, Cloud Functions, Cloud Memorystore, Pub/Sub), achieving 900+ daily active users in 3 months.
- Secured a $25K credit award from Google for Startups Cloud Program, reducing infrastructure costs by 80% during the scaling phase.
- Engineered an automated deployment pipeline that provisions and launches user-generated web apps in under 30 seconds, driving a 40% week-over-week user growth rate.

Engineering Manager (Contract) – AIvanite

May 2025 – Oct 2025 · Remote

AI-enhanced e-commerce solutions for retail brands

- Directed a cross-functional engineering team of 8 delivering AI-driven e-commerce solutions for major retail brands, integrating predictive personalization that increased average conversion rates by 15%.
- Oversaw backend architecture and key API integrations (payments, ERP, OMS), reducing deployment cycle time by 30% through improved CI/CD pipelines and code review processes.
- Grew the engineering team from 5 to 8 through strategic hiring and structured onboarding, cutting ramp-up time for new engineers by 50%.

Co-Founder & CTO – Robominder

Sep 2023 – Apr 2025 · London

AI-powered visual quality inspection platform for manufacturing

- Spearheaded end-to-end development of a proprietary AI visual inspection system achieving 99.5% defect detection accuracy using YOLOv9, PyTorch, TensorRT, and FastAPI.
- Secured $500K seed investment within 3 months by delivering a high-performance MVP.
- Deployed the production solution to 4 enterprise clients - Boots, Morrisons, Reeco, and Butternut Box — processing 50K+ inspection events daily.
- Supervised a cross-functional team of 3 software engineers across the full product lifecycle from R&D to on-site deployment.

Senior Software Engineer – Callsign

Apr 2021 – Sep 2023 · London

Behavioral profiling and fraud-detection analytics serving major UK banks (BoA, Lloyds, and HSBC)

- Engineered a high-performance browser data collection SDK for real-time behavior profiling and threat detection.
- Enabled frictionless, PSD2-compliant authentication journeys, reducing false-positive fraud alerts by 25% while maintaining strict security protocols.
- Delivered critical security features in a fast-paced SAFe agile environment, shipping multiple production releases monthly.

Founding Engineer – Credim

May 2019 – Jul 2020 · Stockholm

Online credit decisioning application for the Nordic market

- Orchestrated end-to-end development of an online credit decisioning platform integrating real-time risk assessment logic, reducing loan approval turnaround from 48 hours to under 5 minutes.
- Architected the complete applicant funnel (acquisition to activation) and built automated data pipelines for credit scoring, increasing decision throughput by 300%.
- Ensured full GDPR compliance and data integrity for 100K+ sensitive financial user records.

Senior Software Engineer – BGL Group 2018 – 2019 · London

UK's leading price comparison website and rewards platform (comparethemarket.com)

- Oversaw the development and maintenance of the high-traffic Rewards platform for comparethemarket.com, serving 10M+ monthly visitors with 99.95% uptime.
- Optimized platform performance by reducing average page load time by 35%, directly improving user engagement and reward redemption rates.
- Partnered with product teams to launch 3 new reward features, increasing user retention by 20% quarter-over-quarter.

CTO – Nearent 2017 – 2018 · London

UK's peer-to-peer rental marketplace for everyday items with integrated delivery

- Architected and built the full-stack C2C rental platform (Node.js, React, MongoDB), designing 12+ backend microservices handling listings, payments, and logistics.
- Deployed a scalable infrastructure on GCP (Compute Engine, Cloud Storage) with a Dockerized CI/CD pipeline, cutting deployment time from hours to under 10 minutes.
- Integrated key third-party APIs for logistics and insurance.

Software Engineer – Stratagem Technologies 2014 – 2017 · London

Sports data and trading analytics platform

- Built 3 high-frequency sports trading platforms with sub-second execution, transforming sports betting into a quantitative asset class through real-time data visualization.
- Executed complex algorithmic workflows combining predictive signals with human analysis, enabling researchers to monitor and trade across 500+ concurrent sporting events.

Teaching & Research Assistant – METU 2010 – 2014 · Ankara

Middle East Technical University – Computer Science Department

- Created computer vision algorithms (Python, OpenCV) for aerial target detection and remote sensing across 2 defense and telecom projects.
- Co-authored 2 peer-reviewed publications on Visual Border Ownership estimation using CRF models.

EDUCATION

M.S., Computer Science – Middle East Technical University 2010 – 2014
CGPA 3.64 / 4.00

B.S., Computer Engineering – Middle East Technical University 2005 – 2010
CGPA 3.06 / 4.00
