SKILLS

Languages
JS, TS, Python, SQL, Go

Cloud & Infrastructure
GCP (BigQuery, Vertex AI, Dataflow, Pub/Sub, Compute Engine, Cloud Run, Cloud Functions), Docker, Kubernetes

AI & Engineering
PyTorch, TensorRT, OpenCV, FastAPI, Node.js, React, MongoDB, Kafka, Grafana

Leadership & Product
Team Leadership, Technical Roadmap, Stakeholder Mgmt, Agile/SAFe, Mentoring, Hiring

EDUCATION

M.S., Computer Science

Middle East Technical University
2010–2014
CGPA 3.64/4.00

B.S., Computer Engineering

Middle East Technical University
2005–2010
CGPA 3.06/4.00

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years in Web Development, Fintech, Robotics and Computer Vision. Proven track record of building scalable full-stack web apps and end-to-end data systems from cloud infrastructure to ML models. Strong expertise in measuring product performance, collaborating with customers and stakeholders, and leading technical teams to deliver complex solutions.

EXPERIENCE

Founder @ Episolo.com

Apr 2025 – Present · London

AI web app builder that turns user prompts into deployed web apps with built-in DB, auth and AI

- Built using Next.js, MongoDB, GCP tools (Cloud Run, Cloud Storage, Cloud CDN, Cloud Functions, Cloud Memorystore).
- Received $25K credit from Google for Startups Cloud Program, reached 900+ daily users and growing.

Software Engineering Manager @ Alpenite

Apr 2025 – Dec 2025 · Remote

AI-enhanced Salesforce Commerce Cloud (SFCC) e-commerce solutions for retail/fashion brands

- Led a cross-functional engineering team delivering AI-driven SFCC solutions for major retail brands, integrating predictive personalization to boost conversion.
- Oversaw backend architecture, key API integrations (payments, ERP, OMS), and improved CI/CD, code review, and monitoring.
- Mentored and grew the engineering team through hiring, onboarding, and performance management.

Co-Founder & CTO @ Robominder

Sep 2023 – Apr 2025 · London

AI-powered visual quality inspection platform for manufacturing

- Led the end-to-end development of a proprietary AI visual inspection tool achieving 99.5% accuracy using YOLOv9, PyTorch, TensorRT and FastAPI and Docker on NVIDIA Jetson edge devices.
- Secured £500K seed investment within 3 months by delivering a high-performance MVP and demonstrating clear ROI.
- Successfully deployed the solution to major enterprise clients including Boots, Morrisons, Reeco, and Butternut Box.
- Managed a cross-functional team of 5 software engineers, overseeing the full product lifecycle from R&D to on-site deployment and maintenance.

Sr. Software Engineer & Tech Lead @ Callsign

Apr 2021 – Sep 2023 · London

Behavioral profiling & fraud-detection analytics (BoA, Lloyds, HSBC)

- Developed a high-performance browser data collection application for real-time behavior profiling, threat detection, and fraud analysis.
- Enabled frictionless, PSD2-compliant authentication journeys, optimizing the balance between strict security protocols and seamless user experience.
- Delivered critical security features in a fast-paced agile environment using SAFe methodology, ensuring rapid iteration and deployment.

- Led the Web SDK project team (5 engineers + 1 PM) for 4 months to deliver data observability and profiling features.

Founding Engineer @ Credim
May 2019 – Jul 2020 · Stockholm

- Led the end-to-end development of an online credit decisioning application for the Nordic market, integrating real-time risk assessment logic.
- Architected the applicant funnel (acquisition to activation) and implemented data pipelines for credit scoring and decision automation.
- Ensured GDPR compliance and data integrity for sensitive financial user data.

Senior Software Engineer @ BGL Group
2018 – 2019 · London

UK's leading price comparison website and rewards platform

- Managed the development and maintenance of the high-traffic Rewards platform for comparethemarket.com.
- Optimized platform performance and reliability, ensuring consistent service delivery for millions of users.
- Partnered with product teams to support new reward features and engagement initiatives.

CTO @ Nearent
2017 – 2018 · London

UK's peer-to-peer rental marketplace for everyday items with integrated delivery

- Architected and built the full-stack C2C rental platform (Node.js, React, MongoDB), including backend microservices for core marketplace functions.
- Deployed a scalable infrastructure on GCP (Compute Engine, Cloud Storage) with a Dockerized CI/CD pipeline, integrating key APIs for logistics and insurance.

Software Engineer @ Stratagem Technologies
2014 – 2017 · London

Sports data & trading analytics platform

- Developed multiple high-frequency sports trading platforms, transforming sports betting into a viable asset class through real-time data visualization and execution interfaces.
- Implemented complex workflows combining predictive algorithmic signals with human analysis, enabling quantitative researchers to operate at scale.

Teaching & Research Assistant @ METU
2010 – 2014 · Ankara

- Developed computer vision algorithms (Python, OpenCV) for aerial target detection and remote sensing in defense & telecom projects; researched Visual Border Ownership estimation.
